PROFESSIONAL SUMMARY

Computer Science student at De La Salle Lipa with hands-on experience developing full-stack web, mobile, and desktop applications using modern technologies such as React, Next.js, React Native, Node.js, Supabase, and PostgreSQL. Currently serving as Back-End Developer Head of the AWS Learning Club and formerly as DevOps Head of AnimoDev, leading technical initiatives and mentoring fellow student developers. Built and deployed multiple projects ranging from offline-first mobile POS systems and real-time communication platforms to geolocation-enabled service marketplaces and desktop productivity applications. Demonstrated strong collaboration and problem-solving skills by securing a Top 10 Finalist position in a highly competitive Agora-sponsored hackathon through the development of an AI-powered real-time voice sales assistant. Continuously expanding expertise in Artificial Intelligence, Machine Learning, Data Engineering, and LLMops through hands-on projects and structured learning in Python, R, statistical analysis, and modern AI technologies. Seeking internship, freelance, or entry-level opportunities in Software Engineering, Full-Stack Development, Mobile Development, and AI/ML-focused roles.

EDUCATION

Bachelor of Science in Computer Science

In Progress

De La Salle Lipa · Lipa City, Philippines

- Relevant coursework: Data Structures, Algorithms, Object-Oriented Programming, Web Development, Mobile Development, Artificial Intelligence, Machine Learning, Database Systems
- Currently a Back-End Developer Head at AWS Learning Club - DLSL
- A former member and DevOps Head of DLSL AnimoDev - the university's software developer organization

TECHNICAL SKILLS

Frontend	JavaScript, TypeScript, React, Next.js 14, Vite, Tailwind CSS, HTML5, Shadcn
Backend & Database	Node.js, Express.js, MongoDB, Supabase, Firebase, PostgreSQL, PostGIS, REST APIs, JWT Auth, Server Actions, Zustand, SQLite
Data Science / ML	Python, Feature Engineering, Data Engineering, Statistical analysis, Machine Learning, Hugging Face, MLOps, LLMops
Mobile	React Native, Expo
Languages	JavaScript, TypeScript, Python, R, C++
Tools & DevOps	Git, GitHub Actions, Vercel, Render, Postman, Figma, Canva, NPM, Bun, Expo Go, PowerSync

PROJECTS

Ely Sales Agent

2026

Hackathon Team Project

- Desktop application real-time voice sales assistant to assist you as a sales representative during live call
- Desktop voice sales assistant prototype built from a Cloudflare Worker and a cross-platform Electron shell
- Tech: TypeScript, Electron, Agora Realtime Communication, Agora Realtime Messaging, Groq API, SQLite

The-Vault

2026

Personal Project

- Offline-first mobile application POS system using React-native, Powersync, and Supabase
- Designed for retail or multi-branch teams that need to manage authentication, business membership, inventory, sales, receipts, analytics, and settings from a single app.
- Tech: TypeScript, React-Native, Supabase, PowerSync, Expo, Zustand, SQLite

TaskOverflow

2026

Personal Project

- Minimalist, task management desktop application built with Electron, React (v19)
- Offers a clean, efficient interface for organizing your work into groups, managing subtasks, and keeping track of deadlines with local-first data persistence.
- Tech: TypeScript, CSS, Electron, SQLite

Website Portfolio

2026

Personal Project

- My professional portfolio as I venture the journey of Software Engineering, and Machine Learning Engineer in the future.
- Tech: TypeScript, TailwindCss, NextJS, Vercel
- Deployed at: eduard-king.vercel.app

CleanOps: Full-Stack Service Marketplace

2025

Personal Project

- Architected a full-stack cleaning services marketplace with real-time geolocation via PostGIS
- Implemented a mock escrow payment system, Supabase Realtime subscriptions, and a multi-role authentication flow, without a traditional Express backend
- Tech: Next.js 14, TypeScript, Supabase, PostGIS, Tailwind CSS, Zustand, Server Actions
- Deployed at clean-ops-alpha.vercel.app
-

Flur Chat: Real-Time Chat Application

2025

Personal Project

- Built a real-time chat client with live messaging, clean UI, and fast performance
- Tech: React, TypeScript, Vite, CSS
- Deployed at flur-chat-client.vercel.app

Hotel Reservation System

2024

Academic Capstone Project

- Full-stack capstone demonstrating database design, RESTful API development, and a polished React UI
- Tech: React, Node.js, Express, MongoDB
- Deployed at webdev-finals-frontend.vercel.app

Faith Hack Formation Act

2024

AnimoDev Organization Project

- Collaborative hackathon project built under time pressure within the DLSL AnimoDev organization
- Practiced rapid prototyping, team coordination, and iterative development

LEADERSHIP & INVOLVEMENT

Back-End Developer Head

May 2026 - current

AWS Learning Club — De La Salle Lipa

- lead the design and development of scalable, secure, and maintainable backend systems for club projects and initiatives.
- Focus on building reliable architectures, optimizing APIs and databases, and promoting best practices in cloud-native development using AWS technologies.

- Contribute to a culture of technical excellence and continuous learning
- Collaborate closely with developers, mentor members in backend and cloud concepts, and ensure that projects are developed with scalability, performance, and long-term sustainability in mind.

DevOps Head

Aug 2025 – May 2026

DLSL AnimoDev Organization — De La Salle Lipa

- Oversee deployment pipelines and infrastructure for organization-wide projects
- Collaborate with fellow student developers on web and software projects under time constraints
- Contribute to a culture of technical excellence and continuous learning
- Utilized Github Workflows to streamline deployments

CERTIFICATIONS: DATACAMP STATEMENTS OF ACCOMPLISHMENT

Course	Issuer	Completed	Hours
Introduction to Python	DataCamp	Feb 08, 2026	4 hrs
Intermediate Python	DataCamp	Feb 10, 2026	4 hrs
Data Manipulation with pandas	DataCamp	Feb 16, 2026	4 hrs
Joining Data with pandas	DataCamp	Mar 01, 2026	4 hrs
Introduction to Statistics in Python	DataCamp	Mar 11, 2026	4 hrs
Introduction to R	DataCamp	Mar 17, 2026	4 hrs
Intermediate R	DataCamp	Mar 25, 2026	6 hrs
Introduction to Data Visualization with Matplotlib	DataCamp	Mar 31, 2026	4 hrs
Introduction to Data Visualization with Seaborn	DataCamp	Apr 06, 2026	4 hrs
Working with the OpenAI API	DataCamp	Apr 12, 2026	3 hrs
Prompt Engineering with the OpenAI API	DataCamp	Apr 25, 2026	4 hrs
Working with Hugging Face	DataCamp	May 12, 2026	2 hrs
LLMOps Concepts	DataCamp	May 18, 2026	1 hr

Total structured learning: 48 hours across Python, pandas, statistics, R, OpenAI API, Hugging Face, LLMOps Concepts

WHAT I'M LOOKING FOR

Open to: Internships · Freelance engagements · Entry-level roles · Remote job

Focus areas: Full-stack web development · Full-stack mobile development · AI / ML engineering
